

ANWESHA MISHRA

Product Support Trainee — Technical Support — Application Support

Odisha, India

Phone: +91-xxxxxxxxxx — Email: test@gmail.com

LinkedIn: linkedin.com/in/xxxxxxxxxx — GitHub: github.com/xxxxxxxx

Professional Summary

BCA graduate with hands-on experience in product support, application troubleshooting, incident handling, and production-like support environments. Experienced in managing tickets, tracking incidents, debugging application issues, validating defects, and coordinating with developers for issue resolution using Jira and ServiceNow. Skilled in SQL, Python, log analysis, and support workflows with practical exposure to customer issue handling, SLA-based operations, and application support activities.

Technical Skills

Product & Technical Support: Incident Management, Ticket Resolution, Troubleshooting, Customer Support, Application Support, Escalation Handling

Tools: Jira, ServiceNow, Git, MS Excel

Database: SQL, PostgreSQL, MySQL

Programming: Python, Java

Testing: Manual Testing, Regression Testing, Debugging, Log Analysis, Defect Tracking

Systems: Windows, Linux Fundamentals

Concepts: SDLC, STLC, Incident Lifecycle, CRM Support, SLA Monitoring, TCP/IP, DNS

Projects

InciTrack – Smart IT Service Desk with SLA Analytics

[Live Demo]

- Developed a full-stack IT Service Desk application using Python (Flask) and PostgreSQL to simulate real-world customer support and ticket management workflows.
- Implemented incident creation, ticket assignment, escalation handling, SLA tracking, and priority-based resolution workflows similar to enterprise support systems.
- Built dashboards for monitoring ticket status, support activities, SLA compliance, incident trends, and workflow performance using real-time reporting logic.
- Processed and analyzed 10,000+ incident records to improve issue tracking, operational visibility, support reporting, and troubleshooting efficiency.
- Performed debugging, validation, and log analysis to identify workflow issues, improve application stability, and reduce recurring support incidents.
- Worked on testing, documentation, workflow optimization, and backend improvements to ensure smooth support operations and reliable application performance.

Internship Experience

QA Engineer Intern (Onsite - Bhubaneswar)

Mar 2026 – Jun 2026

- Executed functional and regression testing while managing defect records, ticket updates, and issue tracking activities using Jira and ServiceNow.
- Handled application issue validation, troubleshooting, log analysis, and debugging activities in production-like support environments.
- Worked with developers and support teams to reproduce issues, verify fixes, monitor escalations, and ensure timely incident resolution within workflow timelines.
- Assisted in tracking customer-reported issues, validating application behavior, and maintaining proper documentation for support and testing activities.
- Used SQL queries and MS Excel reports to analyze test data, monitor issue trends, and maintain structured operational records.
- Participated in support workflow monitoring, defect lifecycle management, incident tracking, and testing coordination during project execution.

Education

Bachelor of Computer Applications (BCA)

Aug 2023 – Mar 2026

Utkal University, Bhubaneswar

CGPA: 8.71 / 10
